Rarekiller 3

User Manual

Autor: Katzerle

07.11.2013

Inhaltsverzeichnis

Introduction:

Rarekiller 3 is a Plugin to use with the Bot Honorbuddy.
It is the Replacement Plugin of Rarekiller and Rarekiller 2

Once installed and enabled it will scan for several things, like:

- Timelost Protodrake for Mount
- Camel Figurines and Dormus for Mount
- Poseidus for Mount
- Objects from Another Man's Treasure and Riches of Pandaria for Achievement
- Dark Soil in Pandaria
- Raptor Nests for Battlepets
- Rare Mobs of Frostbitten (WOTLK) and Bloody Rare (BC) for Achievement
- Cataclysm Rare Mobs for Items
- Blingtron 4000
- Tame Rare Hunter Pets
- Pandaria Rare Mobs for Achievement Glorious!
  (BETA, the Bot has some Problems to kill them)

If one of these Objects or Mobs came in reach, Rarekiller will take control over your toon and aggro the searched Mobs or collect the searched things. Rarekiller is also able to Interact with NPCs (like Blingtron and NPCs of Another Man's Treasure) or Tame Hunter Pets.

NOTE:

Rarekiller will only pull the searched Mobs with a Spell to get Aggro of the Mob. The Fight had to be handled by your Combat Routine. So check that you also have a good working Combat Routine.

Installation from Zip-File

1. Download the Zip-File of the Rarekiller Thread and copy it to the Folder Plugins in your Honorbuddy Folder.

2. Extract the Plugin in the Plugins Folder (Rightclick on the Zip-File → extract here)
It should now look like this:
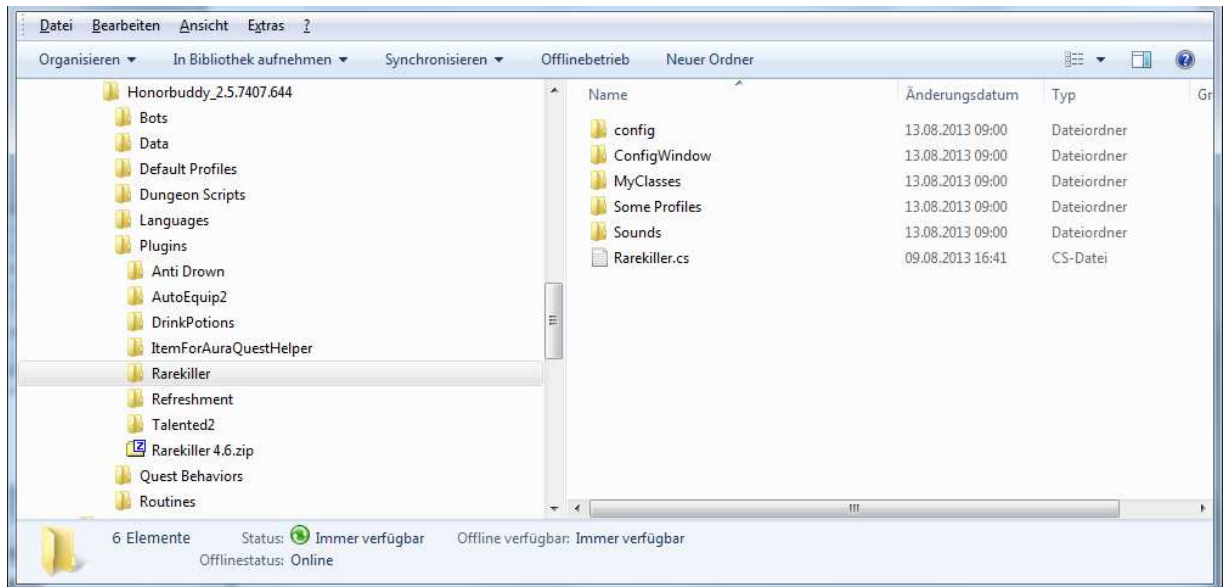

3. **Attention:** enable Auto Dismount in your WOW

4. Start Honorbuddy, log in and wait, till the Initialization of HB is done

5. Activate **Enhanced Mode** and then click on the Button Plugins
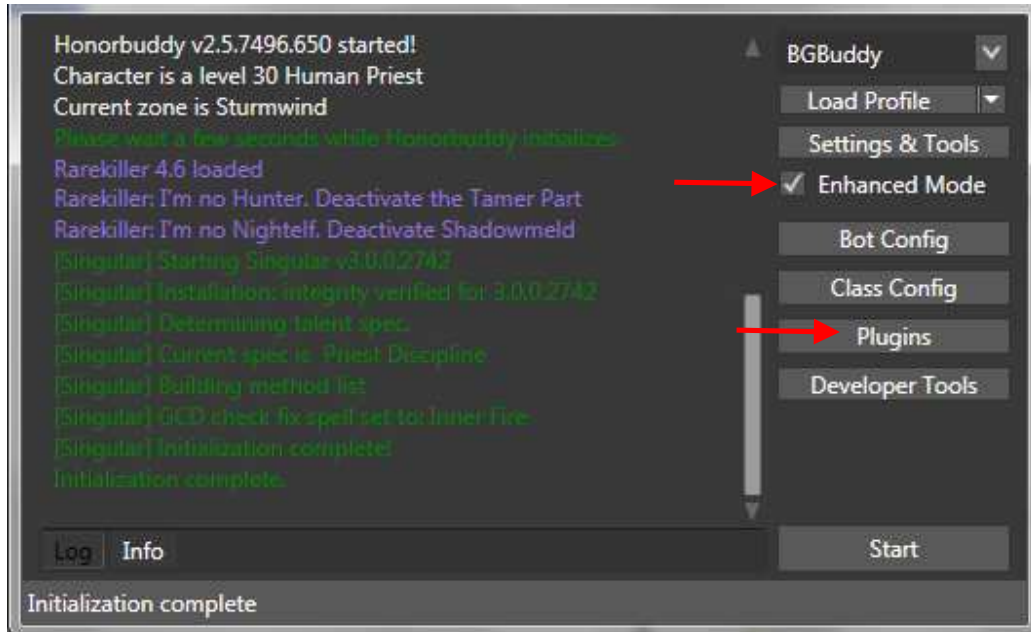

6. Tick the Checkbox on the Name Rarekiller → the Plugin is now enabled
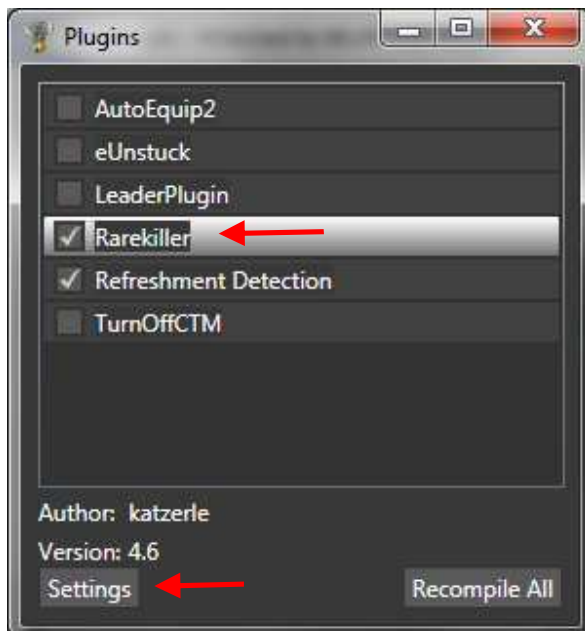

7. If you mark the Line Rarekiller and press the Button "Settings" below, the Setup Window of Rarekiller is shown and you can set up, which things you want Rarekiller to hunt/search for you → See next chapter

8. Select a Botbase (in most cases Gatherbuddy 2 is the one to use) select a Profile for the searched things (you find Several of them in the Forum and in the Folder "some Profiles" of Rarekiller and you can additionally ask me)
Users of the German Version of HB:
Instead of Gatherbuddy2 you can use the FlyAround-Bot with your GB2-Profiles:
http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-botbase-honorbuddyde.html

9. **Attentione:** disable Framelock in your HB settings

10. Press Start in HB

Note: In the Zipfile is also a svn File included, so if you know, how to use svn, it is also possible to update the Plugin via svn from now on.

SVN Installation

1. Install a SVN (I personally use TortoiseSVN)

2. Create a Folder in your Plugins Folder of Honorbuddy named "Rarekiller"

3. Right Click on it and click "SVN Checkout"

4. Use this Link for Checkout (a) is normal Version, b) is BETA Version):

   a. http://katzerls-plugins.googlecode.com/svn/trunk/Rarekiller/

   b. http://katzerls-plugins.googlecode.com/svn/trunk/Rarekiller%20BETA/

5. Next Steps like in Chapter "Installation from ZIP File" 3. -9.

The Setup Window

Rarekiller - Config

Tabs: Rarekiller | MoP Rare Mobs | Slowfall and other Behavior | Dev Box

Rarekiller tab

Raremob Killer
- ☐ *MOP Rare Mobs (Beta)*
- *don't forget to setup Tap2, too*
- ☑ Cataclysm Rares

- ☑ BNWisper
- ☐ Guild _____ [...]

[Sound Test]

customize Pullspell
- ⦿ Default Pull Spell
- ○ Customized Pull Spell:
  - _____
- Pull-Range 10

- ☐ **ANTI-AFK**
- ☐ Shadowmeld
- ☐ Collector: Avoid Objects with Players around

Blacklist unreachable Objects / Mobs / NPCs
- ☐ Blacklist after
  - _____ Seconds

[Default Values]   [Save]

Description of the different Parts:

Tab One – Rarekiller:

- **Raremob Killer**
  If you check these Boxes the Bot will kill:

  - Mists of Pandaria Rare Mobs (this is BETA !!!)
    Here you have to set up on Tab 2 which Mobs you exactly want to hunt

  - Rare Mobs of Cataclysm

  - Rare Mobs for Achievement Frostbitten (you find them in Northend)

  - Rare Mobs for Achievement Bloody Rare (you find them in Outlands).

  - With "All classic Rare Mobs" he will hunt every single Rare of Level 1-60.

  - In the Line "Hunt by Id" you can Rarekiller let hunt every Mob you want. Simply insert the ID in the field.

- **Mounts**
  If you check these Boxes he will hunt:

  - Timelost Protodrake for the Mount

  - Poseidus for the Mount

  - Collect Camel Figurines - He will collect Camel Figurines in Uldum and if he gets ported he will kill Dormus in Feralas.

- **Mobs with Problems**
  Sometimes the bot has Problems to kill these two Mobs. so you can disable killing them:

  - Vyragosa is a flying range Mob. So sometimes if a Melee meets Vyragosa and has a bad combat Routine the toon will do nothing while Vyragose shoots him down, while staying out of Range

  - Blazewing is a very fast flying Mob. Often the bot isn't fast enough to reach him

- **Collector**
  If you check these Boxes the Bot will collect:

  - Objects for the Achievement Another Man's Treasure
    (2 of them the Bot is not able to collect: xxxxx and xxxxx)

  - Dark Soil

  - Raptor Nests in Classic WOW World for Raptor Battle Pets

  - Blingtron 4000 to get the Daylie Gift

- **The Tamer**
  If you check these Boxes the Bot will tame Rares for your Hunter:
  - Tame Pets from XML
    Simply insert your hunted Pets in the File
    Rarekiller/config/TameableMobs.xml and the Bot will tame them for you
    NOTE: If you use SVN Checkout, you have to unzip the Config Files to use the
   Tamer → See next Chapter
    Per default implemented to the List:
    - `<Mob Entry="49822" Name="Jadefang" />`
    - `<Mob Entry="50051" Name="Ghostcrawler" />`
    - `<Mob Entry="50138" Name="Karoma" />`
    - `<Mob Entry="51401" Name="Madexx Red" />`
    - `<Mob Entry="51402" Name="Madexx Green" />`
    - `<Mob Entry="51403" Name="Madexx Black" />`
    - `<Mob Entry="51404" Name="Madexx Blue" />`
    - `<Mob Entry="50154" Name="Madexx Brown" />`
    - `<Mob Entry="50058" Name="Terrorpene" />`
    - `<Mob Entry="32517" Name="Loque'nahak" />`
    - `<Mob Entry="32481" Name="Aotona" />`
    - `<Mob Entry="35189" Name="Skoll" />`
    - `<Mob Entry="33776" Name="Gondria" />`
    - `<Mob Entry="38543" Name="Arcturis" />`
    - `<Mob Entry="32485" Name="King Krush" />`
    - `<Mob Entry="20932" Name="Nuramoc" />`
    - `<Mob Entry="17144" Name="Goretooth" />`
    - `<Mob Entry="50159" Name="Sambas" />`

  - don't kill tameable Mobs → so Rarekiller will not accidently pull the tameable mobs and kill them
  - In the Line "Tame by Id" you can Rarekiller let tame every Mob you want. Simply insert the ID in the field.
  - Footprints MoP (Beta):
    If you check this Box Rarekiller will search for Footprints of the Pandaria Rares.
    Once he founds one he will fly to the Footprint and Alert every 20 Seconds.
    NOTE: No AFK Able taming possible at the Moment.

- **Configurable XMLs**
  For expert Users I implemented some Lists to insert every single Mob, Object or NPC to the hunting List of Rarekiller you want.
  NOTE: If you used SVN Checkout to install Rarekiller, you have first to extract the Zipfile *ConfigFiles.zip* in the Rarekiller/config-Folder.
  It should now look like this:
  - File CollectObjects.xml
    Here you can insert every Object you want Rarekiller to interact with

  - File InteractNPC.xml
    Here you can insert every NPC you want Rarekiller to interact with

  - File KillMobs.xml
    Rarekiller will kill these Mobs if they are not tagged by another Player

  - File TaggedMobs.xml
    Rarekiller will kill these Mobs, only if they are tagged by another Player

  - File TameableMobs.xml
    Rarekiller will tame these Mobs

  - File Blacklisted Mobs
    Here you can Blacklist Mobs permanently Rarekiller will not pull or tame them anymore.

Tab Two - MoP Rare Mobs

In this Tab you can choose which Pandaria Mobs you want the Bot do kill.
They are ordered by Race and by Level.

- **Button Check all**
  This Button will check the Pandaria Rares which I believe the Bot is able to kill. (Tested with good Equipped Shaman)
  The Pandaria Rares, where my toon has big Problems to kill, will stay unchecked and you had to check them manually to hunt them on your own Risk.

- **Button Uncheck all**
  This Button will uncheck all MoP Rares on one Klick.

NOTE:

You have to check additionally "MoP Rare Mobs (BETA)" on the First Tab to let the Mob hunt these Rares.

To hunt Pandaria Rares you need a good equipped Char and a very good combat Routine to get the Kill. It helps if the Combat Routine is able to handle Pets (Shaman Elementals for example) or Heroism and similar Spells.

It is also recommended to deactivate the Interrupt of your Combat Routine. Because Rarekiller needs the Interrupt Spells to interrupt special Abilities of the Rares.
Some Classes need to Skill special Talents for interrupt:

- Class = "Priest" Name="Silence" → Talent had to be skilled
- Class = "Warrior" Name="Disrupting Shout" → Talent had to be skilled
- Class = "Hunter" Name="Silencing Shot" → Talent had to be skilled
- Class = "Warlock" Name="Shadowfury" → Talent had to be skilled
- Class = "Druid" Name="Mighty Bash" → Talent had to be skilled

If the Bot is not able to Kill a Rare he will only try it 3 Times. Then the Bot will Blacklist the Rare and additionally deactivate the Checkbox in the second Tab. So if you want to know after an AFK session where the Bot had Problems, you can open the Settings Window and take a look if there are automatically unchecked Boxes. Save these Settings to prevent the Bot from trying to kill your personal problem Mobs.

Tab Three - Slowfall and other Behavior:

- **Slowfall Behavior**
  Here you can set up a Slowfall Behavior for your Toon. This is mainly if Rarekiller had to pull Flying Mobs like Timelost Protodrake, to prevent the toon from dying.
  Per Default the Bot will try to use **Levitate** of Priest, **Slow Fall** of Mage and **Snowfall Lager** (an Item you can get in Stormwind Peak). If you want the Bot to use other Abilities if falling down, you can set them up here.
  - o **Use Slowfall Spell**
    Here you can insert another Spell you want Rarekiller to use if he falls down
    NOTE: You have to set him up in English
  - o **Use Cloak**
    Here you can let the Bot use a Cloak if he falls down (Mainly for Ingi)
  - o **Use Item**
    Here you can let the bot use an Item if he falls down
    NOTE: You have to set up the Item in your WOW Client Language !!!
  - o **Falltimer**
    If the Bot falls longer then this time, he will use the Item. This is to prevent the Bot from using the Items on every single Jump. Jump to see if you have to fit this to higher time. This time has no influence if the Bot finds the Timelost Protodrake.

- **Customize Pullspell**
  Per default Rarekiller will use these Spells to pull a Mob:
  - o   <Spell Class = "Priest" Name="Shadow Word: Pain" />
  - o   <Spell Class = "Mage" Name="Fire Blast" />
  - o   <Spell Class = "Warrior" Name="Heroic Throw" />
  - o   <Spell Class = "Hunter" Name="Arcane Shot" />
  - o   <Spell Class = "Rogue" Name="Sinister Strike" />
  - o   <Spell Class = "DeathKnight" Name="Icy Touch" />
  - o   <Spell Class = "Paladin" Name="Crusader Strike" />
  - o   <Spell Class = "Shaman" Name="Earth Shock" />
  - o   <Spell Class = "Warlock" Name="Corruption" />
  - o   <Spell Class = "Druid" Name="Moonfire" />
  - o   <Spell Class = "Monk" Name="Jab" />

If you want Rarekiller to use another Spell you can configure your own one here.
NOTE: It has to be an instant Spell without any addictions to, for example, rage or Paladin Seals.
You have to set up the spell in the Language English and check the spelling twice !!!

- **ANTI AFK**
  This Feature will klick the A or D Button after a Random Time to avoid going AFK while camping for a Mob

- **Shadowmeld**
  This Feature will activate Shadowmeld while camping on one Place to prevent your toon getting killed while camping on PvP-Servers

- **Player around**
  If you activate this Feature Rarekiller will not collect Objects or interact with NPCs where are already Players around.

- **Blacklist Timer**
  If Rarekiller is not able to get close enough to the searched Thing during this Time he will Blacklist it and Move on. This is to avoid circle around bottish while trying to reach your searched things.

- **Alert**
  Here you can set up on which events the Bot will Alert and which Sounds he should play then.

  - Alert if he found a searched Thing

  - LUA-Output to the chat Window of your WOW

  - Alert if he gets a Wisper

  - Alert if he gets a Battle Net Wisper

  - Alert if he somebody writes something in the Guild Chat
    (for small personal Guilds)

  With the Button **Sound Test** he will play the Sound set up for "Found a thing". This is mainly to check the Volume of your Sound.

Button - Default Values:

This Button will set the values to the default ones came with Rarekiller.

Button - Save:

This Button will save your Settings to the Folder:
Settings/*Realm*/*Playername*/Rarekiller.config.

Easy Setups for often used Cases:

First of all install and enable the Plugin:

1. Download the Zip-File of the Rarekiller Thread and copy it to the Folder Plugins in your Honorbuddy Folder.

2. Extract the Plugin in the Plugins Folder (Rightclick on the Zip-File → extract here)
It should now look like this:
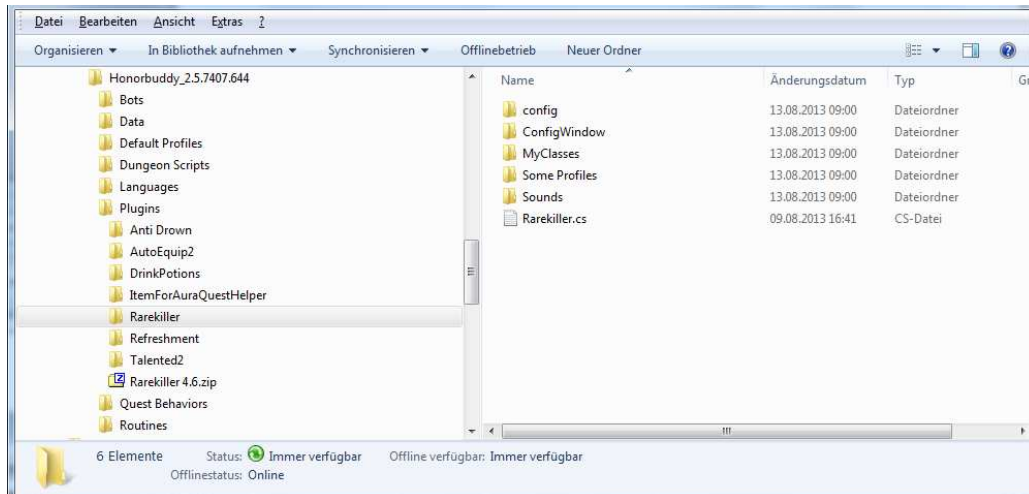

3. Start Honorbuddy, log in and wait till the Init of HB is done

4. Klick on Enhanced Mode and then on Plugins
→ see Pictures in Chapter *Installation from Zip-File*

5. Tick the Checkbox on the Name Rarekiller → the Plugin is now enabled
→ see Pictures in Chapter Installation

6. **Attention:** enable Auto Dismount in your WOW and disable framelock in your HB Settings

Timelost Protodrake:

7. Open the Setup Window

8. Check if Timelost Protodrake (Part Mounts) is activated

9. Go to third Tab and check is Use Slowfall is activated

10. Save the Settings

11. Get some Snowfall Lager (you should buy 10-20).
    You can buy it from Vendor Olut Alegut (Horde) or Rork Sharpchin (Alliance) in Stormpeaks. It costs 2 Relic of Ulduar.

12. Select **Gatherbuddy 2** as Botbase and **TLPD - Bors Breath - GB2.xml** as Profile.
    You find it in the Folder "some Profiles" in the Rarekiller Folder.
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot with **TLPD - Bors Breath - GB2.xml** -Profile:
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-botbase-honorbuddyde.html

13. to be sure everything is working correct you can test the Settings on Chillmaw in Icecrown → see next Chapter

14. Press Start in HB

Test with Chillmaw

To verify if your Settings are correct simply test the thing on Chillmaw in Icecrown.

7. Open the Setup Window

8. Activate Hunt by ID and insert 33687 to the Textbox

9. Go to third Tab and check is Use Slowfall is activated

10. Save the Settings

11. Get some Snowfall Lager (you should buy 10-20).
    You can buy it from Vendor Olut Alegut (Horde) or Rork Sharpchin (Alliance) in Stormpeaks. It costs 2 Relic of Ulduar.

12. Select a **Grindbot** as Botbase and **Empty Profile.xml** as Profile.
    You find it in the Folder "some Profiles" in the Rarekiller Folder.

13. Press Start in HB

14. Fly with your Toon near Chillmaw in Icecrown. The Bot should now kill her.
    If you use Snowfall Lager as Slowfall Ability he will print "you are not in the right Zone" in your WOW, because he tried to use it. Verify if this is also happening !!!

Camel Figurine

7. Open the Setup Window

8. Check if Collect Camel Figurines (Part Mounts) is activated

9. Save the Settings

10. Select a **Gatherbuddy 2** as Botbase and **Camel Figurine Small Route - GB2.xml** as Profile. You find it in the Folder "some Profiles" in the Rarekiller Folder.
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot with **Camel Figurine Small Route - GB2.xml** -Profile:
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-botbase-honorbuddyde.html

11. Press Start in HB

NOTE:

Don't circle around several Hours with the same Profile to prevent your account from being banned and don't gather besides searching for the Camel Figurines. Change the Profiles from time to time or record own ones with ZapRacorder2 Plugin, you can find in the Forum of HB.

Poseidus

You can record them with ZapRecorder2 Plugin, you can find in the Forum of HB.

7. Open the Setup Window

8. Check if Collect Camel Figurines (Part Mounts) is activated

9. Save the Settings

10. Select a **Gatherbuddy 2** as Botbase and select your Profile.
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot with your Profile:
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-botbase-honorbuddyde.html

11. Press Start in HB

Old Setup together with Profile Changer:

NOTE: This Setup has Problems near Nesparia at the Moment with some Buggy Areas in WOW. So at the Moment use your own recorded Profiles in Vashijr and attend the same things about Circle Around for hours like described in Chapter above (Camel Figurine)!!!

7. Get my other Plugin **Profile Changer** from the Forum and install it too

8. Open the Setup Window

9. Check if Poseidus (Part Mounts) is activated

10. Save the Settings

11. Open the Settings of Profile Changer

12. Activate first Line and choose Profile **Poseidus - Quel Dormir - GB2.xml**
    insert a Time between 3 and 15 Minutes

13. Activate second Line and choose Profile **Poseidus - Bielaran Ridge - GB2.xml**
    insert a Time between 3 and 15 Minutes

14. Activate second Line and choose Profile **Poseidus - Thelserat Temple - GB2.xml**
    insert a Time between 3 and 15 Minutes

15. Activate second Line and choose Profile **Poseidus - Glimmerdeep Gorge - GB2.xml**
    insert a Time between 3 and 15 Minutes

16. Activate second Line and choose Profile **Poseidus - Underlight Canyon - GB2.xml**
    insert a Time between 3 and 15 Minutes

17. Select a **Gatherbuddy 2** as Botbase and **Poseidus - Quel Dormir - GB2.xml** as Profile.
    You find it in the Folder "some Profiles" in the Rarekiller Folder.
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot with **Poseidus - Quel Dormir - GB2.xml**-Profile:
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-botbase-honorbuddyde.html

18. Press Start in HB

MOP Rares of 5.1:

1. Open the Setup Window

2. On the first Tap enable "MOP Rare Mobs"

3. Go to second Tab and enable the Mobs you want to kill

4. The Button "Check all" will check all Mobs I'm sure HB is able to kill

5. Select **Gatherbuddy 2** as Botbase
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-
    botbase-honorbuddyde.html

6. Search a Profile in the HB Forum:
    Maybe here - http://www.thebuddyforum.com/honorbuddy-forum/submitted-
    profiles/neutral/79639-glorious-jade-forest-rare-killer-achievement.html

7. Press Start in HB

Another Mans Treasure:

1. Open the Setup Window

2. On the first Tap enable "Another Mans Treasure"

3. Select **Gatherbuddy 2** as Botbase
    Users of the German Version of HB:
    Instead of Gatherbuddy2 you can use the FlyAround-Bot
    http://www.thebuddyforum.com/honorbuddy-forum/plugins/movement/131399-flyaround-
    botbase-honorbuddyde.html

4. Search a Profile for Pandaria in the HB Forum

5. Press Start in HB

Used Default Spells:

If I should use other Spells, please inform me.
I only know Shaman and Priest Abilities. You can also configure them in the Folder Rarekiller/Config/...

DefaultPull.xml - Per Default the Rarekiller will use this Spells to Pull the Mobs:

- Class = "Priest" Name="Shadow Word: Pain"
- Class = "Mage" Name="Fire Blast"
- Class = "Warrior" Name="Heroic Throw"
- Class = "Hunter" Name="Arcane Shot"
- Class = "Rogue" Name="Sinister Strike"
- Class = "Death Knight" Name="Icy Touch"
- Class = "Paladin" Name="Crusader Strike"
- Class = "Shaman" Name="Earth Shock"
- Class = "Warlock" Name="Corruption"
- Class = "Druid" Name="Moonfire"
- Class = "Monk" Name="Jab"

DefaultRangedPull.xml - For Ranged Pull on some MoP Rares he will use

- Class = "Priest" Name="Shadow Word: Pain"
- Class = "Mage" Name="Frostfire Bolt"
- Class = "Warrior" Name="Taunt"
- Class = "Hunter" Name="Arcane Shot"
- Class = "Rogue" Name="Throw"
- Class = "Death Knight" Name="Icy Touch"
- Class = "Paladin" Name="Reckoning"
- Class = "Shaman" Name="Lightning Bolt"
- Class = "Warlock" Name="Corruption"
- Class = "Druid" Name="Moonfire"
- Class = "Monk" Name="Chi Burst"

DefaultInterruptPull.xml - To Interrupt Healing Mists of Pandaren and Torrent of Jinyu:

- Class = "Priest" Name="Silence" → Talent had to be skilled
- Class = "Mage" Name="Counterspell"
- Class = "Warrior" Name="Disrupting Shout" → Talent had to be skilled

- Class = "Hunter" Name="Silencing Shot" → Talent had to be skilled
- Class = "Rogue" Name="Kick"
- Class = "Death Knight" Name="Mind Freeze"
- Class = "Paladin" Name="Rebuke"
- Class = "Shaman" Name="Wind Shear"
- Class = "Warlock" Name="Shadowfury" → Talent had to be skilled
- Class = "Druid" Name="Mighty Bash" → Talent had to be skilled
- Class = "Monk" Name="Spear Hand Strike"

DefaultStunPull.xml - To Stun Spinning Crane Kick of Pandaren or Rain Dance of Jinyu (not necessary because he will flee also):

- Class = "Priest" Name="Psychic Horror"
- Class = "Mage" Name="no Spell available"
- Class = "Warrior" Name="Intimidating Shout"
- Class = "Hunter" Name="Scatter Shot"
- Class = "Rogue" Name="Kidney Shot"
- Class = "Death Knight" Name="Asphyxiate"
- Class = "Death Knight" Name="Strangulate"
- Class = "Paladin" Name="Hammer of Justice"
- Class = "Shaman" Name="Capacitor Totem"
- Class = "Warlock" Name="no Spell available"
- Class = "Druid" Name="no Spell available"
- Class = "Monk" Name="Paralysis"

RunFastSpells.xml - To run away faster if he had to avoid some Pandaria Rare Abilities (also not necessary but makes things easier):

- Class = "Worgen" Name="Darkflight"
- Class = "Priest" Name="Power Word: Shield"
- Class = "Mage" Name="Blink"
- Class = "Warrior" Name="no Spell available"
- Class = "Hunter" Name="no Spell available"
- Class = "Rogue" Name="Sprint"
- Class = "Death Knight" Name="no Spell available"
- Class = "Paladin" Name="Speed of Light"
- Class = "Shaman" Name="Ghost Wolf"
- Class = "Warlock" Name="no Spell available"
- Class = "Druid" Name="Feline Swiftness"
- Class = "Monk" Name="Roll"

Some other Things:

Bot Save:

First: We all know Botting is against the Rules.
So don't bot on an Account you can't afford to lose.

I know many People use this Plugin to get the Rare Mounts on their Main accounts. **Please** don't get slaphappy if you use this Plugin on your Main. There are many ways to look like normal Player while camping special Rares. Just take some Minutes and think about how would you camp this Rare Mob without Bot and try to Set up your Bot that he also acts like you would do.

- Circle around 24/7 the exact same Route over and over for days or maybe also for hours is very risky. Take some breaks between camping sessions.
- If you don't need it, don't let your Bot farm herbs and ore beside camping. He will look like a farmer and after some days or maybe just some hours surely he will attract attention of others.
- If you want to play save, don't leave your Bot alone at home. Turn the Alerts on and your Boxes loud to wake up, if the Bot gets into trouble.
- In my Opinion it is more humanlike to use a Profile with only one fix Hotspot to camp special Rares. If you additional check "ANTI-AFK" on the Second Tab of Rarekiller you will look like a Person who is watching TV beside camping.

Special Thanks to:

- **highvoltz** (I was using his Netherwing Collector as basement to write this Plugin)
- **CodenameG** (His Tips and Plugins helped with the GUI)
- **Bobby** (... for his really amazing CC ShamWOW. It helped me with the Config save and load)
- **Klovene** for his Camperprofile
- **Tvsian** (... for the Safer Loop Timelost Protodrake-Profile)
- **Kickazz** (... for some Tipps)
- **SMcCloud** (... for the original Slowfall-Plugin)
- **Zapman** for his Zapsound
- **Erenion** and his eSafe
- **Brodieman** and the **Developers of Singular** for their Avoiding/Kite Routines

… and Thanks to all the brave Tester of the early Versions of these Plugin
